SUMMARY

Columbia University M.S. in Computer Science student and former Quantitative Researcher at Duquesne Capital. Possesses 5+ years of experience at the intersection of machine learning, applied research and systems engineering.

EXPERIENCE

Duquesne Capital

NYC, NY

Quantitative Researcher

Sep 2023 - March 2026

- Conducted R&D for systematic macro trading team at Stanley Druckenmiller's \$10B+ AUM hedge fund, focused on high-capacity, low-frequency systematic strategies.
- Developed systematic trading models for a global cross-asset portfolio covering more than 50 instruments across FX, fixed income, and commodities, as well as over 1,000 global equities.
- Presented weekly trade pitches and research findings to PMs, translating statistical evidence and macroeconomic rationale into specific investment recommendations.
- Built end-to-end ETLs, trading, and PnL infrastructure from scratch (mainly Python and DuckDB).

Move37AI

Buenos Aires, Argentina

Consultant

Sep 2023 - Feb 2026

- Provided strategic oversight for critical infrastructure and architectural decisions as the firm scaled its operations globally.

Argentina Branch Lead

July 2022 - Sep 2023

- Directed research and technical strategy for a team of 15 in Buenos Aires prior to relocating to the US.
- Grew the team fivefold, from 3 to 15 members, leading end-to-end recruiting and mentoring junior hires.

Founding Machine Learning Engineer

Dec 2020 - July 2022

- Architected a systematic data-driven sports betting system from scratch as the first employee of a quant-focused hedge fund spin-off centered on non-conventional financial markets.
- Expanded operations to over 5mm USD/year across 30 venues - helping establish M37AI as the largest gambling operation in Latin-America.
- Developed machine learning models to participate in niche markets, utilizing self-obtained high-quality data and cutting-edge quantitative techniques to find systematic strategies.
- Optimized predictive models, designed pricing and betting strategies, and engineered ETL pipelines and low-latency live-betting infrastructure, helping grow annual returns from nil to over 25%.

EDUCATION

Columbia University

Jan 2026 - Dec 2027

MS, Computer Science

GPA: 4.00/4.00

Track: Machine Learning

Universidad Torcuato Di Tella

Mar 2017 - Dec 2020

BSc, Economics

GPA: 9.81/10

Valedictorian, class of 2021.

Argentine National Academy of Economic Sciences Excellence Award.

Santander Bank Fellowship.

Best Economics Department thesis of 2021.

Università Bocconi

Aug 2019 - Dec 2019

Exchange Student

GPA: 30/30

Summa cum laude distinction in Computational Microeconomics.

SKILLS

Programming

Python, Stata, R, Rust, SQL

Python Frameworks

Pytorch, Tensorflow, Keras, Pandas, Polars, Numpy, Scikit-learn, xgboost, Selenium, Playwright, Asyncio, Flask, tkinter

Languages

Spanish, English
